

Description and functions

The modern and puristic looking inner screens are suitable for the fan types e², AB 30/60, RA 15-60 as well as ALD. The inner screens are designed in such a way that installation and maintenance are kept as simple as possible. For example, the filter can be easily removed and cleaned.

An airflow regulator can be integrated for the outer wall air vent ALD in order to provide an airflow volume of 15, 20 or 25 m³/h (at 8 Pa) as required.

Included in the scope of delivery:
Filter frame and inner screen
(+ Airflow regulator for the ALD)

Installation

Installation is carried out by inserting (or screwing in the case of the 9/IBG) the filter frame and screen into the wall-tube 9 R 160 or 9/R 160-700.

There is also a note on the correct positioning of the filter frame.

If necessary, wipe the inner screen and the cover frame with a dry soft cloth. Please note that the standard inner screen is not suitable for the e⁹⁰.

The inner screen must snap into place in the open position. There is a corresponding note regarding the open and closed position on the back.

Accessories

Regenerable replacement filters,
Three-pack, G3 9/FIB-3R

Replacement filters for ALD,
Five-pack, G2 9/FIB-2

Pollen filters, three-pack
